

SHAPING THE FUTURE OF BUSINESS PRINTING WITH HEAT-FREE TECHNOLOGY.

Powered by Heat-Free Technology, the Epson WorkForce Enterprise printers, WF-C20600, WF-C20750 and WF-C21000 provide consistent high-speed printing and consume less power which increases productivity while minimising running costs. Designed to suit the varying business needs, these printers offer printing speeds of up to 60, 75, and 100 pages per minute. Also, with fewer replacement parts, these printers are built to reduce environmental impact.

IT'S IN THE DETAILS.

Exceptional Performance

Maximum productivity with consistent high speed printing of up to 100 pages per minute, even in duplex mode.

Environmentally Friendly

With Epson Heat-Free Technology, significantly less power consumption meets less frequent part replacements to reduce impact on the environment.

Enhanced Finishing

Enjoy greater flexibility with new finishing options that allow stapling, hole-punching and booklet printing.

Go Heat-Free with Epson

Not all printers are the same. Laser and inkjet printers may look the same on the outside, but it is what's on the inside that counts.

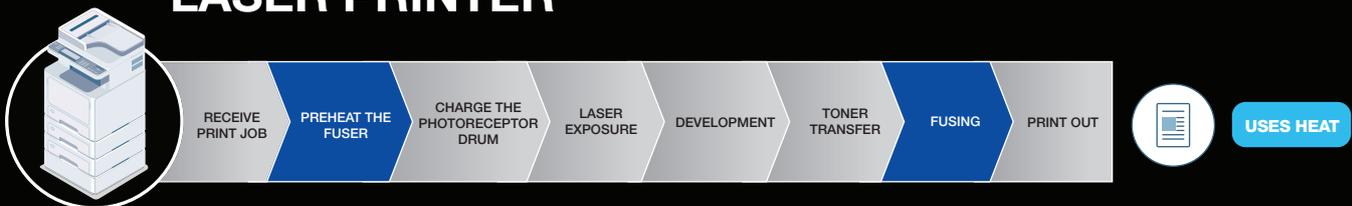

The laser printing process is complicated, comprising preheat, charging, exposure, development, transfer, and fusing steps. Fine toner powder is transferred to a sheet of paper through contact and fused with a combination of heat and pressure.

In contrast, Epson's inkjet printers are simple, non-contact systems. They deposit ink droplets on the media, without the use of heat.

EPSON INKJET PRINTER

LASER PRINTER

Switch to Epson Inkjet Heat-Free Printers to Enjoy Advanced Customer Benefits

Save time with consistent high speed printing

No heat is required to warm-up, allowing the printer to print immediately. Consistent high speed printing up to 100 pages per minute is possible, even for high coverage documents.

Less power consumption saves energy and money

With no fuser unit to heat, reduce energy consumption by up to 85%* compared to laser printers, resulting in cost savings for electricity bills.

Fewer replacement parts, lower environmental impact

Uses up to 59% fewer replacement parts** than laser printers. No heat damage to the printhead.

Less intervention increases productivity

With fewer parts to replace and printheads that last longer, the amount of intervention is decreased, providing improved reliability and reduced downtime.

* Testing was commissioned by Epson to Keypoint Intelligence-Buyers Lab. Two comparison models were selected from colour laser multi-function printers in the 65-70 ppm class. Tests were conducted at the devices' default settings using Keypoint Intelligence-Buyers Lab standard energy consumption test methods. Calculations were based on a weekday workload of 2 x 4 hours printing + 16 hours in sleep/standby mode, and weekend energy use of 48 hours in sleep/standby mode. A total of 69 pages of workload test pattern .doc, .xls, .ppt, .html, and Outlook files were printed 6 times in each 4-hour printing period.

** Testing was commissioned by Epson to Keypoint Intelligence-Buyers Lab, based on Epson WF-C20590. Two comparison models were selected from colour laser multifunction printers in the 65-70 ppm class. Calculations were based on the frequency and volume of consumables and replacement parts required to print 1 million pages (ISO/IEC 24712 test pattern) over a period of 5 years.

PrecisionCore Heat-Free Technology

PrecisionCore is the next-generation inkjet printhead technology driving Epson's inkjet resolution. It merges advanced key component technologies, state-of-the-art MEMS* fabrication and high-precision assembly processes honed over decades.

Epson's proprietary Micro Piezo inkjet technology doesn't use heat in the ink ejection process, and it's this Heat-Free Technology that separates our printers from the competition. Epson's Heat-Free printers does not require heat in the ink ejection process. Instead pressure is applied to the Piezo element, which flexes backwards and forwards firing the ink from the printhead.

*MEMS (Micro Electro Mechanical Systems): Devices possessing mechanically driven elements, manufactured through the application of semiconductor processing technology.

PRECISIONCORE
HEAT•FREE

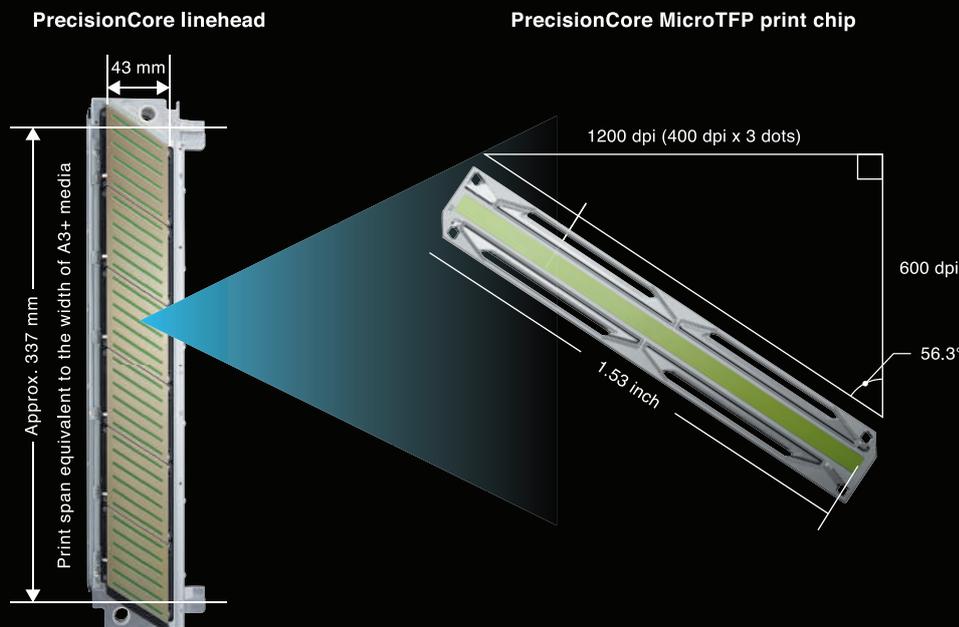

PrecisionCore MicroTFP Print Chip

MicroTFP print chips are the core element of PrecisionCore Heat-Free Technology. By achieving higher precision and greater miniaturization in Epson's advanced thin film piezo (TFP) technology, the basic performance of this printhead module has been radically improved, and application to a wider range of uses made possible.

The thin film piezo element that drives ink ejection is approximately 1 micron thin (one-hundredth the thickness of a human hair). By closely controlling the voltage applied to such piezo elements, it is possible to fire up to 50,000 shots of ink per second from a single nozzle, to precise positions and in the necessary quantities.

PrecisionCore Linehead

By optimally arraying 36 of these MicroTFP print chips in a diagonal configuration, Epson has developed a compact linehead just 43 mm wide that boasts about 33,500 active nozzles. This size-conscious core device contributes to reduced space requirements of the product itself, and successfully enables high-speed performance of printing up to 100 pages per minute, within a compact design.

Save Time With Consistent High-speed Printing

The WorkForce Enterprise is able to realise the same productivity level, in simplex and duplex printing of up to 100 pages per minute due to its shortest duplex route design.

SIMPLEX

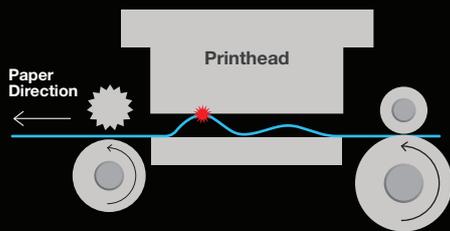

DUPLEX

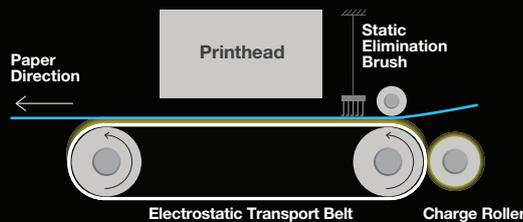

Switchback paper path design ensures ultra-fast throughput even in duplex printing.

Conventional Printer

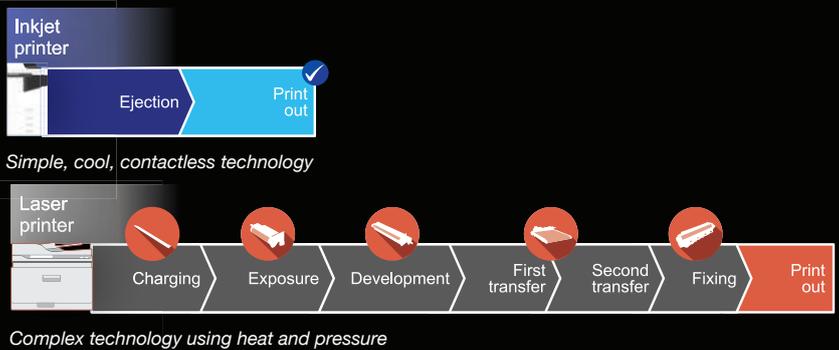

WorkForce Enterprise

Thanks to Epson's efficient paper transport mechanism, enjoy reliable and consistently excellent image quality of up to 600 x 2400dpi (600 x 1200dpi as default).

Ultra-fast First Page Out Time

Collect your first printed page in approximately 5.0 seconds*. There is minimal warm-up time due to the WorkForce Enterprise's simple yet superior technology versus laser printers.

Superb Print Quality With DURABrite™ Pro Ink

Using high capacity ink cartridges, print up to 100,000 pages in black** or 50,000 pages in colour without interruption. This means fewer consumable changes, reducing waste and allowing for less user intervention.

The fast drying pigment ink is also water resistant, safeguarding your printouts from accidental spills.

*Based on Epson testing methodology
** Based on 2 cartridges

Low Power Consumption Saves Energy And Money

Epson Heat-Free Technology uses less power than laser technology because it does not use heat to warm up. As Epson inkjet printers have no fuser unit to heat, this results in significantly less energy consumption.

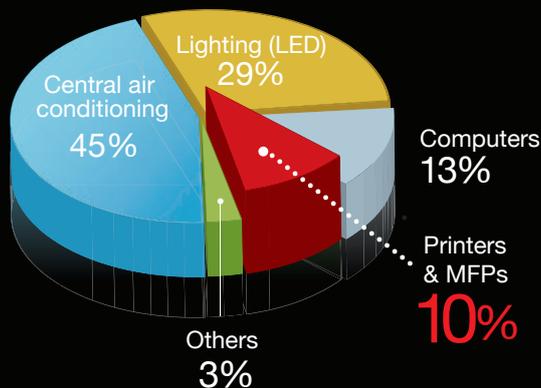

Epson Inkjet Printers Up to **85%** less power consumption* VS Laser Printers

Reduce Power Consumption with Epson Heat-Free Printers

In today's offices, only central air conditioning and lighting consume more energy than office automation equipment. In fact, printers and MFPs account for as much as 10% of electric consumption. Replacing laser printers with Epson WorkForce Enterprise can cut printing-related energy significantly. Lower energy consumption also reduces environmental impact because it reduces CO₂ emissions.

How power is consumed at the office**

*Testing was commissioned by Epson to Keypoint Intelligence-Buyers Lab, based on Epson WF-C20590. Two comparison models were selected from color laser multi-function printers in the 65-70ppm class. Tests were conducted at the devices' default settings using Keypoint Intelligence-Buyers Lab standard energy consumption test methods. Calculations were based on a weekday workload of 2 x 4 hours printing + 16 hours in sleep/standby mode, and weekend energy use of 48 hours in sleep/standby mode. A total of 69 pages of workload test pattern .doc, .xls, .ppt, .html, and Outlook files were printed 6 times in each 4-hour printing period.

**Epson research based on data from a commissioned survey conducted in March 2018 by SOMPO Risk Management & Health Care Inc.

Fewer Replacement Parts, Lower Environmental Impact

Thanks to Heat-Free Technology, Epson inkjet printers use fewer parts that need replacing than in a laser printer, and our printheads are not a consumable. This reduces the environmental burden of manufacturing and recycling the additional resources.

Epson Inkjet Printers Up to **59%** less replacement parts*** VS Laser Printers

Certified Environmental Performance

Epson is committed to developing environmentally conscious products, which means that sustainability is considered from conception to completion. Our Epson WorkForce Enterprise Printers, WF-C20600, WF-C20750, and WF-C21000 comply with some of the world's most stringent environmental certification standards.

We offer sustainable innovations because we recognise that the choices we make as organisations, individuals or a society will be essential to our shared success.

Less Intervention Increases Productivity

The Heat-Free structure of Epson inkjet printers means that there are fewer parts that can fail, which reduces the amount of intervention required. As a result, Epson inkjet printers offer improved reliability and significantly reduced downtime.

Comparison of periodic replacement parts

Epson WorkForce Enterprise WF-C20590

Laser printer

Note: Images represent periodic replacement parts of a standard laser printer. Actual type and number of parts vary by model.

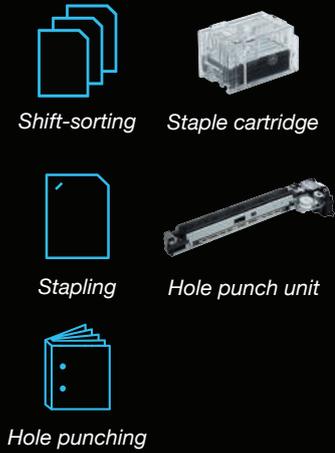

Note: After printing out more than 1.2 million sheets, other replacement parts will be required in addition to paper feed rollers.

*** Testing was commissioned by Epson to Keypoint Intelligence-Buyers Lab, based on Epson WF-C20590. Two comparison models were selected from color laser multi-function printers in the 65-70ppm class. Calculations were based on the frequency and volume of consumables and replacement parts required to print 1 million pages (ISO/IEC 24712 test pattern) over a period of 5 years.

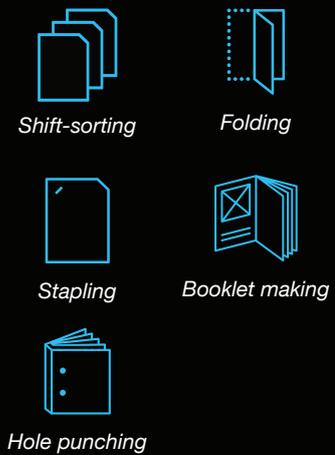

Enhanced Finishing Capability

Increase productivity with advanced finishing such as stapling, hole punching and booklet printing.

Stapler Finisher

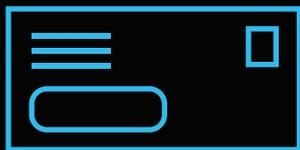

Booklet Finisher

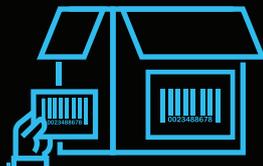

Diverse Paper Media Printing

With Epson's Heat-Free Technology and smart design, the WorkForce Enterprise is able to support printing up to A3+ size on a wide range of special media types of varying thickness (up to 350 g/m²) and length (up to 1.2m), using the Multipurpose Tray.

Envelope with window

Sticker media

Long paper (up to 1.2m)

Thick paper (up to 350 g/m²)

Friendly Operability

The WorkForce Enterprise simplifies it for large workgroups to print, copy, scan, to email and more at ultra-fast speeds. When it comes to replacing the ink, there are no messy toner cartridges to deal with and no waiting for parts to cool.

Enjoy impressive scan speeds of up to 60ppm/110ipm in duplex. The dual CIS technology allows convenient duplex scanning in a single pass.

The intuitive 9" touchscreen panel with a user-friendly interface makes it simple to operate the printer.

Easy front access door to the printer's ink cartridges makes replacement fast and hassle-free.

Easy refill of paper with these cassette trays that can be opened smoothly and effortlessly.

Easy removal of jammed paper with easy-to-follow instructions from the printer.

Easy front access to maintenance box allows maximum printer uptime.

Advanced Workflow Solutions

Take advantage of remote management, customise print options and enjoy seamless compatibility with the Epson WorkForce Enterprise. Integrate these into your existing IT infrastructure to improve productivity and increase efficiency. For more information, please visit www.epson.com.sg/software-solutions.

Epson Solutions

Fleet Management

Epson Device Admin

Control, analyse and manage your printer fleet centrally from one intuitive interface, designed to increase productivity, reduce costs and ensure maximum security.

Epson Remote Service (ERS)

Epson's cloud-based device monitoring and management system supports your service provider to deliver advanced remote diagnostics for Epson business products.

Print and Scan Management

Epson Print Admin

Boost productivity and monitor print usage via this server-based solution that creates a secure printing, scanning and copying environment through user-authentication.

Epson Print Admin Serverless

Seamlessly integrate the WorkForce Enterprise series into security and compliance rules, and regulations without the burden of maintaining a server system.

Epson Open Platform

Gain complete control of your printing operations via a web-based application that enables you to adapt your printer to meet specific and changing business requirements with solutions that help you better manage your printing.

Document Management

Document Capture Pro*

Easily scan, view, edit and manage scanned documents for processing or integrate them into cloud services. This software optically recognises barcodes, characters and blank pages in scanned documents to separate them into different folders. It also allows user to create of up to 30 customised job settings, with additional features of built-in OCR capability and password protection for devices and documents.

* Document Capture Pro (Windows), Document Capture (Mac OS X), limited functionality for Mac version

Document Capture Pro Server

Centralise scanning and manage a fleet of up to 100 scanners without the need to install drivers on individual computers. Create and assign up to 30 job settings right to the panel with a single web interface. Process and distribute documents securely and track them with reports.

Connectivity Features

Network Connectivity and Standalone Capability

Equipped with Ethernet, Wi-Fi, RJ-11 fax, Wi-Fi Direct and USB 3.0, the printer is apt for office environments. In addition, Wi-Fi Direct acts as an access point, allowing up to four devices to connect to the printer at a time.

Expandable Connectivity

The printer comes standard with a network port for shared usage across the network. Expand connectivity to multiple networks with the additional network option.

Up to 3 fax ports can be added for simultaneous communication.

Epson Connect Enabled

Print your documents from any part of the world wirelessly with Epson Connect's wide range of features:

- **Epson iPrint** - Print from and scan directly to your smart device or online cloud storage services.
- **Epson Email Print** - Print to any Email Print-enabled Epson printer from any device or PC with email access.
- **Remote Print Driver** - Print to a compatible Epson printer anywhere in the world via the internet using a PC with Remote Print driver or from mobile devices via the Epson iPrint app.
- **Scan to Cloud** - Share your scans through email or store them online in cloud storage services.

Other mobile solutions:

- **Mopria™ Print Service**

Robust Security Features

Secured Printing with PIN Release

Print confidential documents by setting a PIN to a print job for release on the printer panel.

IP Address Filter

Secure your documents by preventing unauthorised devices from connecting to the printer.

Panel Admin Mode

Set a password to access and change administrator settings for the printer. This prevents unauthorised users from changing the printer settings.

Limited Access Function

Reduce risk of information leaks by limiting the access to functions for up to 10 user accounts.

LDAP Address Book

Prevent information leaks by using the address book registered in the LDAP server to accurately select recipient's email addresses.
